VNR VJIET

Name of the Experiment: Shopping Cart

Name of the Laboratory:

Web Technologies

Experiment No: Week – 4 **Date:**

1. Program to declare variables using var,let & const.

```
var x = 15;
let y = 25;
const z = 35;
console.log(x, y, z);
```

2. Program to demonstrate block scope , global scope.

```
let a = 8;
if (a < 10) {
   let b = 50;
   console.log(a);
   console.log(b);
} else {
   console.log("a is greater");
}
```

3. Program to swap 2 numbers.

```
let s = 30;
let t = 40;
let temp = s;
s = t;
t = temp;
console.log(s, t);
```

4. Program to demonstrate use of operators.

```
let m = 300;
let n = 150;
console.log("Addition:", m + n);
console.log("Subtraction:", m - n);
console.log("Multiplication:", m * n);
```

23071A12H3

```
console.log("Division:", m / n);
console.log("Power:", m ** 3);
```

5. Program to check given number is even or odd.

```
if (s % 2 === 0) {
   console.log("Even:", s);
} else {
   console.log("Odd:", s);
}
```

6. Program on conditional operator

```
let hasAadhar = "yes";
let age = 22;
console.log(age >= 18 && hasAadhar === "yes" ? "Eligible to vote" : "Not eligible");
```

7. Program to check if a number is positive, negative or zero.

```
let num = 5;
if (num < 0) {
   console.log("Number is Negative");
} else if (num === 0) {
   console.log("Number is Zero");
} else {
   console.log("Number is Positive");
}
```

8. Program to Display day name using switch

```
var day=2;
switch(day){
   case 0: console.log("sunday");
   break;
   case 1: console.log("monday");
   break;
   case 2: console.log("tuesday");
   break;
```

2307 1A12H3

```
    case 3: console.log("wednesday");
    break;
    case 4: console.log("thursday");
    break;
    case 5: console.log("friday");
    break;
    case 6: console.log("saturday");
    break;
}
```

9. Program to demonstrate factorial of a given number.

```
let number = 5;
let fact = 1;
for (let i = 1; i <= number; i++) {
    fact *= i;
}
console.log(fact);
```

10. Program to check a number is prime or not.

```
function isPrime(p) {
    if (p <= 1) return "Not Prime";
    for (let i = 2; i < p; i++) {
      if (p % i === 0) return "Not Prime";
    }
    return "Prime";
}console.log("7 is", isPrime(7));
```

11. Function to check if a number is palindrome or not

```
function checkPalindrome(num) {
    let original = num;
```

23071A12H3

```
    let reverse = 0;
    while (num > 0) {
        reverse = reverse * 10 + (num % 10);
        num = Math.floor(num / 10);
    }return original === reverse;
}
```

12. Demonstrate a function with return value;

```
function demo(o, q) {
    return {
        sum: o + q,
        diff: o - q
    };
}
let result = demo(50, 20);
console.log(result.sum);
console.log(result.diff);
```

OUTPUT:-

15 25 35	VM604:5
8	VM604:11
50	VM604:12
40 30	VM604:23
Addition: 450	VM604:28
Subtraction: 150	VM604:29
Multiplication: 45000	VM604:30
Division: 2	VM604:31
Power: 27000000	VM604:32
Even: 40	VM604:36
Eligible to vote	VM604:44
Number is Positive	VM604:53
Tuesday	VM604:61
120	VM604:71
7 is Prime	VM604:81
Palindrome	VM604:93
70	VM604:103
30	VM604:104
